graphics. Thank you for your cooperation.

To Download the graphic files do the following:

If you are using a PC put your mouse arrow over the desired graphic and click the right hand button on your mouse. Then click "save Picture as" and save it to your computer. DO NOT do anything to the graphic with a paint application as it is a compiled .gif. You can change the name through your explore file manager but you need to leave the extension alone.

If you are using a Macintosh place the mouse over the image you want to download. Then hold the mouse button down until a menu screen pops up. Finally, choose the appropriate selection from the menu and save the image.

Bellsnwhistles.com - Animated Graphics, Pictures, Backgrounds, and More.

Web Site Building Helps, Software Downloads, Java Applets, Web Resources, Web Tools, Javascript, Midi Links, etc.

[The Bells page](#) has the HTML code for midi files, many javascripts, HTML codes for things you wonder about, and a lot of other things for you to freely use to enhance your site.

[The Java Applets and DHTML Menu Effects page](#) has the DHTML and Java Applets for making menu files which will make your site more exciting and better looking.

[The Java Applets and DHTML Image Effects page](#) has the DHTML and Java Applets for enhancing the visual layout of your site which will make your pictures take up less desktop space while showing off your pages, pictures, and photographs.

[The Java Applets and DHTML Text Effects page](#) has the DHTML and Java Applets for making banner and eye catching text files which will make more people take the time to read your text information and admire your banners.

[The Editors page](#) has HTML editors of all types - from simple WYSIWYG to professional quality text editing - all free. **We Don't put these here just because they are free. We actually think they are excellent products and are worth using. Many applications don't make the cut here and are not included. We use the Nvu editor ourselves and have tested all the rest on our select list. Take a look! You might save a lot of money!**

[The Software page](#) contains free software which will make your machine run better and will enhance your internet experience. **Again, remember that we Don't put these here just because they are free. We have used or do use these and we actually believe they are excellent**
